

# Hospital Solutions

Technologies for Advancing Patient Care

**HAEMONETICS®**

# Deliver Care with Confidence

Hospitals go above and beyond to tackle the challenge of providing the highest standards of patient care.

Haemonetics delivers quality hospital solutions that prioritize patient outcomes to help clinicians confidently provide the best possible care. Backed by over five decades of industry expertise, our technologies are designed to drive procedural effectiveness and elevate the patient experience.

## PROCEDURE-ENABLING TECHNOLOGIES

Our solutions, including Blood Management Technologies and Interventional Technologies are designed to help solve the everyday challenges that hospitals face. These procedure-enabling technologies are backed by an experienced team to ensure seamless implementation, while helping to increase efficiency and cost-effectiveness across the care continuum.

### Hemostasis Management

Viscoelastic testing that provides rapid, actionable results to help clinicians reduce risks, complications and costs.

**TEG<sup>®</sup>6s**  
**TEG Manager<sup>®</sup>**

### Cell Salvage

Autotransfusion technology that helps hospitals avoid unnecessary allogenic transfusions, while helping to reduce related costs.

**Cell Saver<sup>®</sup> Elite<sup>+</sup>**

### Transfusion Management

Integrated transfusion management software solutions that help support transfusion safety, from the blood bank to the bedside.

**SafeTrace Tx<sup>®</sup>**  
**BloodTrack<sup>®</sup>**  
**BloodTrack Tx<sup>®</sup>**

### Blood Management Technologies

Help inform treatment decisions, avoid unnecessary transfusions, and optimize the management of blood products.

### Interventional Technologies

Help improve patient diagnosis, treatment, and outcomes by putting clinicians in control with technologies that will increase procedural effectiveness and efficiency.

### Vascular Closure Systems

Rapid hemostasis for Interventional Cardiology and Electrophysiology procedures to help improve the patient experience and support same-day discharge.

**VASCADE<sup>®</sup>**  
**VASCADE MVP<sup>®</sup>**  
**VASCADE MVP XL<sup>®</sup>**

### Sensor Guided Technologies

Advanced fiber optic pressure guidewires designed for precision and efficiency, empowering clinicians to optimize outcomes in coronary and structural heart procedures.

**SavvyWire<sup>®</sup>**  
**OptoWire<sup>®</sup>**

### Esophageal Protection

The first FDA granted temperature regulation device indicated to reduce the likelihood of ablation-related esophageal injury resulting from radiofrequency (RF) cardiac ablation procedures.

**ensoETM<sup>®</sup>**

# Value Beyond the Technology

Investing in technology is an important clinical and economic decision for hospitals. Clinicians need to be confident that their partner will provide the ongoing support needed to optimize the hospital's investment. With Haemonetics, clinicians have access to a comprehensive suite of programs and services as well as experienced clinical and support teams who are there for your hospital every step of the way.

# Ensuring Hospitals Don't Skip a Beat

## Trusted Partnership:

The best solutions don't stop with the technology. To help hospitals and clinicians best support patients, we provide training, resources, and direct access to clinical support teams. Through ongoing partnership, our team helps clinicians improve procedural effectiveness and efficiency, patient safety and satisfaction, and the quality of care hospitals provide.

## Consistent Reliability:

When clinicians have confidence in the reliability of every tool at their disposal, both patients and hospitals benefit. With decades of experience, we continue to innovate and create greater access to technologies that help advance healthcare standards.

## Who is Haemonetics?

Haemonetics is a global healthcare company dedicated to providing a suite of innovative medical products and solutions for customers, to help them improve patient care and reduce the cost of healthcare. Our technologies address important medical markets: blood and plasma component collection, the surgical suite and hospital transfusion services.
