For more than 40 years,

HAEMONETICS®

hospitals have been turning to Haemonetics to help reduce the risk, complications and costs associated with blood product transfusions.

The market and clinical applications for autologous blood recovery were first developed by Haemonetics, and we continue to invest in the technology to advance the science of patient blood management.

HAEMONETICS®

Customer and patient focused

The Cell Saver® Elite®+ system provides hospitals with an easy-to-use, reliable way to recover and deliver back a patient's own high-quality blood during medium to high blood loss surgeries. Clinicians benefit from a system designed to be intuitive and flexible for optimal performance, supporting exceptional patient care. Our Scientific Advisory Council members covering Trauma/Critical Care, Cardiac Surgery, Anesthesiology and Cardiology help guide product development and clinical research initiatives.
